

## **NEWS RELEASE**

# **The municipality of Borås selects the PortWise product suite to secure its eGovernment services**

**PALO ALTO, CA and STOCKHOLM, SWEDEN – August 21, 2007. The Swedish municipality of Borås has selected the PortWise product suite to secure its eGovernment services. PortWise unique scalability allows Borås stad to deliver secure online services to over 100 000 users.**

- "We selected PortWise because they truly show an interest for us as a customer and for our requirements and that they are flexible and are at the edge of technology" says Johannes Adolfsson, IT strategy officer at Borås Stad. "The evaluation of different vendors showed us that no one except PortWise delivered a secure and integrated solution with support for the Swedish national identity cards."
- "Our software solution delivers the most cost effective way for customers to enable secure collaboration especially for environments like Borås Stad where a large number of users need access to different services" says Per Hägerö VP Products at PortWise.

The PortWise product suite is the only solution on the market that delivers a security solution for eGovernments that is purely based around software. The PortWise product suite delivers a solution that enables organizations to easily deploy authentication and access to all types of users. With its integrated approach PortWise delivers a much more cost effective solution that competing one purpose solutions.

Borås24 is the municipality's project to develop online services to citizens, organizations and companies. Just using one single login citizens are able to use personalized online services, just like they do today with eBanking.

PortWise provides completely secure access to critical information and applications for the mobile workforce and distributed partner networks, from any device in any location. Its Application-Oriented Access solution is the industry's first fully integrated single platform to enable the secure mobilization of the workforce while driving efficiencies and protecting the integrity of the organization. Unlike point solutions and simple SSL VPN, PortWise provides deep integration with other security services within the enterprise. PortWise is an international software company with offices in the United Kingdom, Sweden, United States, India, Singapore, and partners across in Europe, Asia and Americas.
